SUMMARY

B.Tech Computer Science & Engineering student with hands-on web development experience and a strong foundation in Java and software development fundamentals. Skilled in building responsive, interactive web applications using HTML, CSS, and JavaScript, with practical experience in DOM manipulation, event handling, debugging, accessibility, and performance optimization. Strong problem-solving and algorithmic thinking with a focus on clean, maintainable code.

TECHNICAL SKILLS

Languages: JavaScript, C++, SQL, Python, Java
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST API, JWT
Databases & Tools: MongoDB, SQL, Git, GitHub, VS Code
CS Fundamentals: Data Structures & Algorithms (DSA), OOP, DBMS

EXPERIENCE

Web Developer Intern — Flikt Technology Web Solutions December 2025 – January 2026

- Built responsive, cross-device web applications using HTML, CSS, and JavaScript, prioritizing usability and performance.
- Developed a Music Playlist Web App with dynamic song rendering, interactive playback controls, and responsive layouts.
- Built a Modern Calculator supporting real-time computation and input validation through JavaScript event handling.
- Created an Interactive Image Gallery with thumbnail previews, modal views, and CSS animations.
- Debugged and optimized front-end code, improving performance, accessibility, and cross-browser compatibility.
- Applied semantic HTML5 and SEO best practices to strengthen maintainability and search visibility.

PROJECTS

India First AI Clinic OS

- Built a real-world application to digitize and streamline clinic workflows and operations.
- Applied web application development and software engineering principles to deliver a structured, user-focused solution.

School SaaS

- Developed a school management SaaS platform to digitize education-related workflows.
- Designed features emphasizing usability, maintainability, and real-world requirements.

AI Resume Analyzer

- Built a Resume Analyzer application to evaluate resume content against job requirements.
- Delivered a recruitment-focused tool demonstrating strong problem-solving and requirement-driven development.

EDUCATION

Qualification	Institution / Board	Year	Percentage / CGPA
B.Tech, Computer Science & Engineering	Kanpur Institute of Technology, Kanpur	Expected 2027	71.38 % (up to current semester)
Senior Secondary (Class XII)	UP Board	2022	71 %
Secondary (Class X)	UP Board	2020	81 %

CERTIFICATIONS

- Full Stack Development Training** — Flikt Technology Web Solutions (December 2025 – January 2026)
- Generative AI Essentials, TCS iON Career Edge** — Tata Consultancy Services (July – August 2026)
- Web Development Fundamentals** — IBM SkillsBuild (September 2026)
